

Neutral Display Cases **OMI** for Protection of Goods

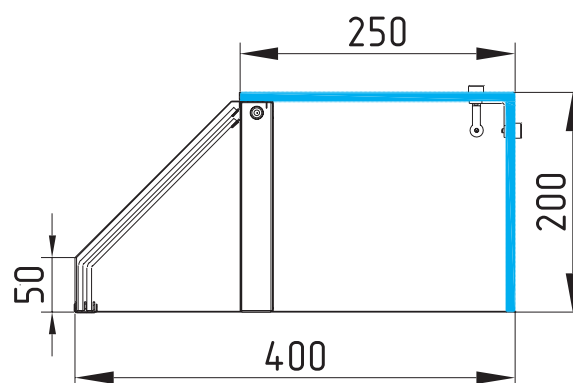

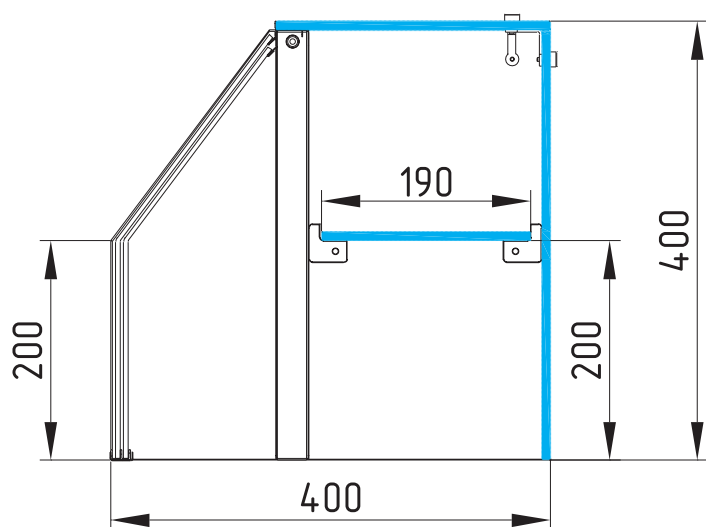

CHARACTERISTICS:

Neutral display cases are ideal for protecting food from chapping and dust, and other components that are contained in the air. This type of display cases protects products from excessive moisture, and from excessive dryness. Designed in a modern cubic design, are installed in places of trade on the table, bar, counter. Convenient and easy to maintain.

They have one depth, 2 heights, 6 lengths. The standard equipment includes a glass case with a thickness of 8 mm, sliding doors made of polycarbonate holding support. As options, you can choose the LED backlight and mount to the countertop.
